## Tomahawk School District Functional Behavioral Assessment and Positive Behavior Intervention Plan

## **Student Information:**

Name:	Grade:
Date of Birth:	Teacher:
Age:	Case Manager:

School

## Functional Behavioral Assessment and Data

1. Describe the target behavior(s) of concerns including the frequency, duration and intensity of the behavior. Also, describe the sources of data and collection processes used to complete this description.

2. Describe the setting in which the target behavior(s) occurs (when, where, and with whom) does it happen.

3. Describe what precedes the behavior(s) of concern.

4. Describe the function of the behavior. What does the student get from of the behavior?

5. Describe the environmental conditions that may affect the target behavior(s). Examples may include: medication, medical condition, sleep, diet, schedule, social factors, etc.

6. Describe the behavioral interventions attempted to modify the target behavior(s) and the results of those attempts. (Include the data gathering method and positive behavioral incentives used.)

7. Describe the desired or replacement behavior that will serve as a functional alternative to the target behavior(s) and the method of attaining the behavioral functional equivalent. (Include data collection method)

## **Behavior Management Plan and Data Collection**

8. Describe the non-restrictive interventions planned to develop and strengthen the more appropriate behaviors. Include the positive incentive plan for rewarding the absence of the maladaptive behavior and the presence of the replacement behavior/s.

 Describe any restrictive or highly restrictive interventions planned to develop/strengthen the more appropriate behaviors. Examples may include: restraint (must have a crisis/emergency plan to use restraint), removal from the environment, etc.

10. Who is responsible for implementing this plan, collecting the data, and evaluation of the data? Include the schedule for date evaluation.

**11.** How will the data evaluation be communicated with the parents and who is responsible for data reporting?
